

Yes!

Your home is constructed in a controlled environment. It will not suffer weather-related damages, such as warped wood or wet drywall. That means fewer surprises and repairs later on, and a healthier home.

-Our building systems effectively utilizes construction and tradesmen efficiencies along with purchasing power to save you money.

-Virtually any house plan can be adapted.

-Our design flexibly allows you to change just about any feature of the home, including the number, type and size of rooms.

-While the site is being prepared, your home is being built. This means you move in faster!
