

WHY MODULAR?

STRESS!

The modular manufacturer's ability to save time and time equals money if you know what you are doing.

THE HEADACHES!

That builder's face on a daily basis can be alleviated. The Manufacturer's capacity to control the process is also shared by the builder. Does two days of rain threaten to throw your schedule off by a week? Rain doesn't matter inside a factory.

MODULAR HOUSING CREATES JOBS!

It doesn't take them away. Depending on the level of finish, in the home, sometimes a considerable amount of work needs to be done on site. All the foundation work, plumbing and electrical connections, assembly and completion, as well as landscaping, all are done outside the factory.

FINALLY!

Site builders and the site built housing industries are not the competition. They are your customers. Competition takes place between companies, not between the process or method through which they build a home.

END RESULTS!

A CUSTOM BUILT HOME FOR A LIFETIME OF ENJOYMENT.
